Council Motion

Meeting on June 25:

“To write a letter to GARFO requesting that the Agency immediately issue a rule reverting the Redfish Exemption Area back to its FY 2019 state and urge the agency to work collaboratively with Sectors and their members to understand the nature of the fishery, the exemption as refined in FY 2015 and if necessary develop modifications for future rulemaking.”

Carried 13/1/2.

Background

- REDNET project (2010)
- Sector Exemption first implemented in 2012
- Modifications have been made several times to observer coverage, mesh size, catch monitoring levels

Groundfish AP Recommendations

Meeting on June 9:

The Groundfish Advisory Panel recommends the Committee request to the Council to request that GARFO initiate an Emergency Action for the groundfish fishery in light of COVID-19 measures to immediately reinstate the Redfish Exemption Area back to the FY2019 geographic range.

(Carried 7/2/0)

Groundfish Committee Tasking

Meeting on June 10:

“The Groundfish Committee tasks the Groundfish Plan Development Team to look at the data used by GARFO to modify the redfish exemption area and report back to the Council at the June Council meeting.”

Carried by unanimous consent, without objection.

PDT Discussion

- On June 17, the Groundfish PDT received a presentation by GARFO staff on the redfish area exemption analysis in order to better understand the approach and data used.
- PDT Feedback:
 - Comparison of only redfish-declared trips to the completed analysis would be helpful.
 - Additional maps adjusted for confidentiality showing where redfish targeted (observed) hauls have occurred and additional statistics may be informative (but may not show a different conclusion).
 - The PDT did not draw conclusions of the analysis. A written, methodological summary document prepared by GARFO would facilitate deeper review, if a more detailed evaluation of the analysis is requested by the Council for the PDT to review.
