16.0

Effective July 3, 2013, NOAA Fisheries reinstated the Eastern U.S./Canada Area quota monitoring methodology where catch is attributed to area fished based on vessel monitoring system (VMS), vessel trip reports (VTRs), and interactive voice recording (IVR) information. This change was retroactively applied to all data since the May 1, 2013, start of the fishing year.

For additional information contact the Sustainable Fisheries Division at (978) 281-9315.

Notice

The 2013 Quota Period began on May 1, 2013, therefore this report does not contain any landings reported prior to May 1, 2013.

Management actions for the Common Pool Program, under the authority of the Regional Administrator (such as closures and possession limits) are based upon Vessel Monitoring System (VMS) reports and other available information.

*The limited access flect is not split into dredge and trawl components because there is insufficient observer coverage for such a stratification.

**There is no kept column for the limited access general category IFQ fleet because vessels are not allowed to retain yellowtail flounder.

***The Georges Bank yellowtail stock area does not include statistical areas 521 and 526. Data reported here are for statistical areas 522 and 525 only.

For more information on the methodology used to estimate yellowtail flounder catch click here

In order to comply with data confidentiality requirements, discards for areas and/or gear types that only have 1 - 2 trips in a month will be aggregated with discards from preceding month(s) until the 3 trip minimum is met.

NOTE: This report uses in-season audited observer data (March - August 2013) and preliminary observer data (September 2013 - present) for Closed Areas I and II; and the most recent 12 months of audited observer data (September 2012 - August 2013) for open areas.

These data are the best available to NOAA's National Marine Fishery Service (NMFS) when this report was compiled. Data for this report are supplied to NMFS from vessels via Vessel Trip Reporting and the Vessel Monitoring System, and dealers via Dealer Electronic Reporting. Data may be preliminary. Discrepancies with previous reports are due to corrections made to the database.

*The limited access fleet is not split into dredge and trawl components because there is insufficient observer coverage for such a stratification.

**There is no kept column for the limited access general category IFQ fleet because vessels are not allowed to retain yellowtail flounder.

For more information on the methodology used to estimate yellowtail flounder catch click here

In order to comply with data confidentiality requirements, discards for areas and/or gear types that only have 1 - 2 trips in a month will be aggregated with discards from preceding month(s) until the 3 trip minimum is met.

NOTE: This report uses in-season audited observer data (March - August 2013) and preliminary observer data (September 2013 - present) for limited access trips into Nantucket Lightship; audited observer data (March - August 2013) and preliminary observer data (September 2013 - present) for limited access general category IFQ trips into Nantucket Lightship; audited observer data (May - October 2011; March 2012; June 2012 - July 2012) for limited access general category IFQ trawl trips in Mid-Atlantic; and the most recent 12 months of audited observer data (September 2012 - August 2013) for both fleets in Southern New England and Mid-Atlantic.

These data are the best available to NOAA's National Marine Fishery Service (NMFS) when this report was compiled. Data for this report are supplied to NMFS from vessels via Vessel Trip Reporting and the Vessel Monitoring System, and dealers via Dealer Electronic Reporting. Data may be preliminary. Discrepancies with previous reports are due to corrections made to the database.

Windowpane Flounder Sub-ACL for the Directed Scallop Fishery Southern New England/Mid-Atlantic Stock Area
