

Control Date to Address Movement of LAGC Permits between Categories

Background: The following motion was made at the March 30, 2017 Scallop Committee meeting in Providence, RI. The Council will be considering this motion at its upcoming June meeting. Currently, LAGC B (NGOM) and C (Incidental) permit holders may move between permit these two permit categories annually. LAGC IFQ permit holders can make a one-time transition from IFQ to NGOM/Incidental. There have been 7 total IFQ permits that have converted to NGOM/Incidental permits since 2010.

Motion 2: Hughes/Stockwell

Move that the Committee recommends that the Council consider establishing a control date, with intent of freezing the footprint on NGOM permits by not allowing any future upgrades of incidental catch permits.

Rationale: Control date would address the movement between the NGOM and Incidental permit categories.

The motion carried on a show of hands. 9/0/1

What is a Control Date?

A control date is a date that may be used by a fishery management council, fisheries commission or by NOAA Fisheries in establishing eligibility criteria for determining levels of future access to fisheries, or sectors of fisheries. Establishing a control date does not commit the Councils, Commission, or NOAA Fisheries to develop any particular management system or criteria for participation in these fisheries. The Councils or Commission or NOAA may choose a different control date, or may choose to establish a management program that does not make use of such a date.
