### September TRT Meeting Goals

- Brainstorm and analyze possible measures to achieve 90% risk reduction coastwide
- Develop a shared set of notes that synthesizes this analysis, including collections of measures that Team members can vet within their respective communities during the subsequent weeks (e.g., scoping by states), and DST modelers can further analyze. The notes will signal areas where Team members are most aligned and where they hold divergent views.
- Identify next steps to prepare for the November decision-making meeting, including addressing critical information needs.
- The Agency will not be seeking a formal consensus-recommended approach on preferred management measures at this September meeting.
