NOTICE OF LISTENING SESSIONS

For Monkfish and Skate Fisheries

The New England Fishery Management Council (Council) is conducting five listening sessions to solicit comments on ideas for fishery improvements in the monkfish and skate fisheries. These sessions are designed to identify the challenges the monkfish and skate fishing sectors are grappling with and to identify possible management measures for the Council to address those challenges in the future. In June of 2026, the Council will consider comments received during these meetings and in December of 2026, the Council will consider these comments when developing 2027 Council work priorities. Given monkfish is jointly managed with the Mid-Atlantic Council, during its August 2026 meeting, the Mid-Atlantic Council will receive the same meeting summary and an update on any outcomes of the June 2026 New England Council meeting.

Date and Time

Location
